

**BIOSYNEX COVID-19 Ag BSS** VIROLOGY

A rapid test for the qualitative detection of COVID-19 antigen in nasal swab

**BIO**SÝNEX

Easy to use Using nasopharyngeal swab in only a few steps

Rapid detection of COVID 19 antigens **Results in 15 minutes** 

Convenient and easy to use The kit can be stored at room temperature or refrigerated (2-30°C)

COVID-19 is a disease caused by a novel coronavirus (CoV) SARS-CoV-2 also known as 2019-nCoV.

In order to facilitate patient management and to identify infected individuals, especially those at risk of complications, it is essential to be able to rapidly detect the presence of CoV-2-SARS.

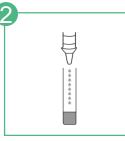

The BIOSYNEX COVID-19 Ag BSS is a rapid chromatographic immunoassay for the qualitative detection of COVID-19 antigen, in only 15 minutes, using a nasopharyngeal swab.

### PROCEDURE

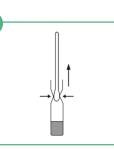

Do a nasal

cavity swab.

Add 10 drops (0,3mL) of buffer.

Insert the swab into the tube. See procedure cf. Instruction for use.

Screw on the cap of the tube and place **4 drops** of the solution in well S.

COVID-19

т

Read the result at **15 minutes**. Do not read after 20 minutes.

Watch the video illustrating the sampling here: http://youtu.be/DVJNWefmHjE

#### RESULTS

POSITIVE

# NEGATIVE

С

INVALID

#### **PERFORMANCE\***

- Sensitivity: >95%
- Specificity: 100%

\*Compared to a PCR test. Read the instruction for use for more information.

## **KIT CONTENTS**

BIOSYNEX COVID-19 BSS Ref. SW40006

#### Contains:

- 25 test cassettes
- 25 buffer vials
- 25 nasal swabs
- Instuctions for use

*In vitro* diagnostic medical devices. Read the instructions for use carefully.
